

Golf Course Guide

Great courses to play with specials all year.

Quick Tips To Help Your Game

If you find that your day on the course is either awesome or awful, here are a few tips to help level out your golf experience.

1. Think Green To Tee. Start each hole by deciding where you want to be with your shot into the green. This will help you decide what to hit off the tee.
2. Manage Expectations. Keep your focus on each shot as opposed to the overall score. You can't have the best or worst round of your life after only four holes, so relax and play each hole as it happens.
3. Watch Approach Shots and Putts. Learn from the shots of others in your group to help give you an edge about what you should do. Around the green, watch where they land the ball and see how much it releases (rolls) and use it as a guide for your shot.
4. Stay Positive. Tell that voice in your head that tends to point out your flaws that you need it to be your caddy and focus on encouragement. You will feel better and have more energy the more positive you can be on the course.
5. Stay Hydrated. One of the key causes of stress is dehydration. Keep yourself loose and relaxed by drinking enough water while you're on the course. Even if you're not thirsty, it's a good idea to have some water with you.

Enjoy the 2014 season!
